DETAILED ACTION

This action is responsive to the amendment filed 11 May 2007. Claim 5 is cancelled. Claims 1-4 are currently pending.

Response to Amendment

The amendment to claim 4 overcomes the prior rejection under 35 USC §101.

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takaoka (JP 2002-051156A).

With regards to claims 1-4, Takaoka discloses a system in which a mobile telephone receives image data from a monitoring camera. The image data is displayed

on the monitor of the mobile telephone (see abstract). Furthermore, a number of other devices can receive the image data, such as a notebook computer, PDA, or PHS ([0005], [0009]).

With regards to claims 1-4, Takaoka does not explicitly disclose that a converting unit converts the image based on received model information of the viewing device. However, those skilled in the art would recognize that the display capabilities of mobile telephones, PDAs, PHSs, and notebook computers vary widely. As such, it would have been obvious at the time of the invention to include transmission of, at least, information about the type of device being used to view the image data.

Conclusion
